The Police Service in Scotland Performance Report

- [Overview/Explanations](#)
- Inter-relationship between the:
 - [Scottish Government/Single Outcome Agreements \(SOAs\)](#)
 - [Scottish Strategic Assessment\(SSA\)](#)
 - [Scottish Policing Performance Framework\(SPPF\)](#)
- [Significant Changes In National Performance](#)
- [Performance Indicators](#)
- [The Policing Landscape: Force strength \(headcount\), land area and population](#)

The Overview/Explanations section is applicable to all of the report and must be borne in mind when viewing statistical information contained in the document.

Navigating through the Report

The report offers a degree of electronic navigation by use of hyperlinks. The text, which offers a hyperlink, has been coloured blue. Links back to the starting point are similarly coloured blue and will appear at either the beginning or end of a section of text or a reference point beside a statistical table.

Overview/Explanations

Data Included

All data is supplied by individual forces and is drawn from their respective databases. These figures are regularly used in other reports such as force crime bulletins and reports to police boards.

It should be noted that due to seasonal variations, fluctuations in performance occur. These fluctuations may be short-term and due to a variety of reasons, such as school holidays, events happening at a particular time in the year, daylight hour changes and operations or initiatives undertaken.

Audit and Accountability

The ACPOS PMBA Performance Reporting Sub Group (PRSG) closely monitors the data in the report and holds forces accountable for the quality of their submissions and examines differences in performance standards to allow the identification of good practice. In addition, indicators are subject to audit either internally or externally.

Commentary

The commentary section in this report will focus on significant variations in performance at a national level and will identify a force(s), which has impacted on the direction of travel nationally. Variations within force figures which may be important to that individual force, but do not impact on the national picture, will not be commented upon.

Points To Note:

- The statistics contained in this report are provisional and subject to change following auditing.
- Where an overall Scotland figure is not shown this is primarily due to not all forces being able to submit data. The following abbreviations/symbols are used throughout the report:

N/A Not available due to force technical issues
N/S Not submitted by a force(s)
~ A comparison / calculation cannot be made due to missing data
∞ Denotes that the calculation grows beyond any assigned value.
- A full explanation of all the counting conventions can be obtained from the technical notes contained within the Scottish Policing Performance Framework Manual. The technical notes are available at <http://www.acpos.police.uk/SPPF/Index.html>.
- The measurements detailed in this report are only the ones where the police are the data providers or have access to the data. The report does not reflect all the measurements within the Scottish Policing Performance Framework (SPPF).
- Figures detailed as per 10K of the population relate to the resident population and does not take cognisance of transient or migratory populations.

Click to return to [Contents](#) page

- Whilst great effort has been made to ensure that the year-on-year change displayed in the tables is accurate, these figures are subject to rounding.
- Currently there is no national standard in relation to incident recording. Consequently, there will be some variation between forces in the extent to which incidents are recorded. Some forces record only those which involve interaction with members of the public e.g. complaints of antisocial behaviour or reporting a crime or road collision. Other forces, in addition to recording those incidents which involve interaction with members of public, also use their IT systems to record non-interaction incidents e.g. abnormal loads, warrants etc.

INTER-RELATIONSHIP BETWEEN SOAs, SSA AND THE SPPF

Scottish Government/Single Outcome Agreements

The purpose is to focus Government and public services on creating a more successful country, with opportunities for all of Scotland to flourish, through increasing sustainable economic growth.

Strategic objectives are:

- Wealthier and Fairer - enable businesses and people to increase their wealth and more people to share fairly in that wealth.
- Healthier - help people to sustain and improve their health, especially in disadvantaged communities, ensuring better, local and faster access to health care.
- Safer and Stronger - help local communities to flourish, becoming stronger, safer place to live, offering improved opportunities and a better quality of life.
- Smarter - expand opportunities for Scots to succeed from nurture through to life long learning ensuring higher and more widely shared achievements.
- Greener - improve Scotland's natural and built environment and the sustainable use and enjoyment of it.

To enable the Scottish Government to meet those strategic objectives each local authority has signed up to a Single Outcome Agreement (SOA). These are agreements between the Scottish Government and each Local Authority which sets out how each will work in the future towards improving national outcomes for the local people in a way that reflects local circumstances and priorities. Further information on the National Performance Framework is available at

<http://www.scotland.gov.uk/Publications/2007/11/13092240/9>

Click to return to [Contents](#) page

Scottish Strategic Assessment

The Scottish Strategic Assessment (SSA) is a prioritised strategic picture of crime and disorder issues currently impacting upon Scottish Communities at all levels. It also includes proposals about the prevention; intelligence and enforcement (PIE) responses that would best address them. This document is produced based on intelligence and information sources from all eight Scottish Police forces, the Scottish Crime and Drug Enforcement Agency (SCDEA), British Transport Police, the UK Borders Agency, the Serious Organised Crime Agency (SOCA) and Her Majesty's Revenue and Customs (HMRC). Open source research is also undertaken and partners are engaged with during the production of this document.

The very high priorities identified in the SSA for 2010/11 are:

- Public Protection
- Terrorism
- Serious Organised Crime Groups
- Antisocial Behaviour
- Violence

Activity undertaken in line with the PIE responses for these areas is monitored through the Scottish Control Strategy with appropriate performance measures identified to assess success in these areas.

Outcome based performance measures reflecting these areas are either currently reported in the SPPF or being developed for future iterations.

Further information on the SSA is available at
<http://www.acpos.police.uk/BusAreas/ScottishStrategicAssessment2010.html>.

Click to return to [Contents](#) page

Scottish Policing Performance Framework

The SPPF is divided into four areas of policing, designed to capture the breadth of police activity.

The four areas are:

- Service Response
- Public Reassurance & Community Safety
- Criminal Justice & Tackling Crime
- Sound Governance & Efficiency

In each of the four areas of policing, High Level Objectives have been identified which reflect the fundamental aims of that area. The performance indicators contained within these areas are divided into Inputs (the resource committed), Activities (the activity or process used) and Outcomes (what is achieved).

There are a number of context measures, which can be used in conjunction with the performance indicators contained within the SPPF. Context measures are not measures of performance, but are designed to provide contextual information of the demands on a police force and the environment they operate within.

It is acknowledged within the police service in Scotland that effective policing is based on sound partnerships. This is reflected in the High Level Objectives within the SPPF. In order to encourage a partnership approach, there are also a number of performance indicators within the SPPF, which should be considered partnership indicators and will rely upon the contribution of a range of partners for successful delivery.

The SPPF structure has also been designed to support the measurement and reporting of local priorities and indicators, in accordance with the principles of Best Value. By incorporating the SPPF in their performance reports, forces can ensure greater consistency and transparency when reporting performance information to Police Authorities and the public throughout Scotland.

The SPPF also complements and supports the delivery of the Scottish Government's Strategic Objectives. It contains the associated national indicators that relate to criminal justice and should be seen as a useful source of performance indicators for inclusion in SOAs.

Significant Changes In National Performance

(commentary)

Complaints about police officers and police staff

The time spent on investigating a complaint will differ depending on the complexity. In some instances investigations into complaints featured during this reporting period may still be ongoing. This can therefore lead to considerable variations across forces in relation to the number of closed allegations arising from complaints.

The general direction of travel for the number of complaints cases and the number of 'on duty' closed allegations is positive. However, Dumfries & Galloway has reported an increase in the number of complaints and 'on duty' closed allegations. The force has monitored this area of business and there are no identifiable reasons for this increase.

Fife has reported an increase in the number of 'on duty' closed allegations and this due to the force adopting a more robust method of recording allegations.

Number of quality of service closed allegations contained within complaints cases

The general direction of travel for this indicator is positive, however, Northern have reported an increase. The force's Professional Standards and Conduct Unit are proactively working to close cases this year.

Proportion of 999 calls answered within 10 seconds

All forces are performing consistently well in this indicator. Northern are marginally below the 90% target of answering 999 calls within 10 seconds, however the force deals with the majority of their calls within 13 seconds.

Handling of non-emergency calls

The target for the proportion of non-emergency telephone calls answered within 40 seconds is 90%. Nationally the police service was slightly below this target.

Central experienced a high call volume, due to the extreme weather conditions in November and December 2010, affecting their ability to answer calls within 40 seconds.

Fife is now focusing more on resolution of reported issues at the first point of contact. Whilst this has resulted in a slight dip it has reduced demand on frontline officers.

The abstraction rate of customer service representatives within Strathclyde Contact Centre is contributing to the decrease in answering calls within 40 seconds.

Number of recorded crimes and offences and detection rates

Group 1 to 4 recorded crimes are primarily criminal acts directed towards a specific intended victim. Forces would hope for a year on year decrease as they prevent members of the community becoming a victim of crime.

Group 5 to 7 are predominantly crimes and offences that do not have a specific intended victim and can be:

- a) identified through proactive policing measures;
- b) offences against the state e.g. resisting arrest, obstructing police constable etc.; and/or
- c) evidence led e.g. speeding, drink driving etc.

These crimes and offences can therefore fluctuate significantly year on year.

Group 1 – Crimes of violence (recorded)

The general direction of travel for this group is positive against the 3-year average. However, Lothian & Borders and Northern have both reported a slight increase. Lothian & Borders has had an unfortunate number of murder cases as well as one perpetrator identified and prosecuted for a number of threats and extortions. Northern will continue to monitor this increase.

Group 2 – Crimes of indecency (recorded)

Two specific factors will impact on the direction of travel for crimes of indecency:

- a) Many crimes in this category tend to have been committed prior to the reporting period e.g. a person who was a victim of this type of crime as a child reporting the incident when they reach adulthood. There are often fluctuations in the figures as investigations uncover evidence to allow multiple crime reports to be submitted.
- b) The new Sexual Offences (Scotland) Act 2009 effective from 1 December 2010. The Act aims to tackle the widespread criticism of the current law surrounding rape and other sexual offences, particularly the gender specific nature of the common law offence of rape this will lead to an increase in rape records. Also there are a number of crimes now covered by the Act previously recorded elsewhere i.e. either as a Communications Act or possibly a Breach of the Peace. In addition there may be instances where the crime will be reported under both the common law and the statutory acts.

It should be noted that due to the extremely sensitive and often difficult nature of enquiries for this group no proceedings may be taken for a number of justifiable reasons. Forces can therefore mark a crime as “enquiries concluded” if it fits specific criteria e.g. there is an identified, definitive suspect. It should therefore be noted that whilst a crime may still be undetected, it may be that the investigation has concluded.

Group 4 – Fireraising, malicious and reckless conduct (recorded)

Investment in tackling antisocial behaviour across Scotland is seen as the most significant change, which has coincided with continuing year on year reductions in crimes involving fireraising and damage. This year Scotland is about 23% below the 3-year average, with a fall of 11,279 or 15% on the previous year.

Group 5 – Drugs and other crimes (recorded)

These crimes are often regarded as a measure of the amount of ‘proactive’ work a police force undertakes. The crimes included within this group are often crimes against society rather than individuals. The nature of these crimes means that a very high detection rate is normal for this group.

One of the main crime types within this group is that of drugs. Whilst the figures for drugs may be low, this is not necessarily a sign of a lack of proactive work. Forces can spend a considerable amount of time gathering intelligence and evidence to dismantle organised crime groups dealing drugs. The number of drug dealing cases can also hide the volume and value of drugs seized, the table on page 31 shows a notable increase in the weight of Class A drugs seized. Apprehending a major drug dealer may have little impact on the crime statistics, with potentially only one or two offences recorded, but the apprehension of the person may have an impact on the community, and can result in significantly reducing the availability of drugs in the area.

Group 1 – Crimes of violence (detection rate)

The detection rate for crimes of violence is usually relatively high; however, cities face greater challenges detecting crime due to their size and larger, more transitory populations. Rural areas tend to have smaller more stable communities who know each other and are more likely to be able to identify perpetrators and provide intelligence.

Number of recorded antisocial behaviour community crimes & offences and detection rates

This indicator is currently under review and will be amended from 1 April 2011. The reason for this review is that crimes and offences within the sections do not reflect the true nature of antisocial behaviour.

Level of detected youth crime

A direct correlation should not be made between the statistics recorded in this indicator and the statistics in the recorded crimes and offences indicator. The number of recorded crimes and offences are all crimes whether detected or undetected. The number committed by young people can only be based on those crimes and offences, which have been detected.

A comparison between detected youth crime committed and those crimes detected would highlight that some forces have a high percentage of youths committing crimes. Care must be taken in making these comparisons because those forces with higher detection rates and performance may give a false impression of a higher number of youths offending when it may be that the level of youth offending is similar across all Scotland.

Number of persons killed or injured in road collisions

While Scotland suffered severe weather conditions over the period October to December 2010, the number of road casualties was less than the previous year. However, the continued bad weather into 2011 e.g. melting snow freezing over night could potentially have a negative impact on the year-end figures.

Number of reports submitted to the Procurator Fiscal

The national trend is that the number of reports to the Procurator Fiscal has reduced, with the exception of Dumfries & Galloway, where the overall rise has been driven by a substantial increase in the number of general road policing and camera enforcement cases.

Number and percentage of reports submitted to the Children's Reporter within 14 calendar days

In recent years, in line with 'Restorative Justice in Scotland ~ Guidelines for Police', forces have adopted formal restorative warnings in order to:

- reduce the number of juveniles entering the system;
- reduce the number of referrals to the Scottish Children's Reporters Administration (SCRA);
- improve the quality of referrals to the SCRA; and
- reduce crime.

Additional assessments in the decision making process are now necessary for appropriate disposal, which can be a warning by a police officer, a referral to a partner agency or a referral to SCRA. A number of reports are considered by multi-agency panels, which meet weekly to make referrals to SCRA.

These changes maximise available resources and ensure that juvenile offenders receive the most appropriate disposal. They have led to a reduction in referrals to SCRA but due to the length of time the

remaining reports take to reach SCRA, have resulted in a reduction in the percentage of reports arriving within target time. This change has adversely affected the submission times for Tayside.

[Number of formal warnings issued](#)

The national trend is that the number of formal warnings issued has reduced, with the exception of Strathclyde. The reason for this increase is the force's greater use of direct measures in appropriate instances as part of the criminal justice process.

[Number of domestic abuse incidents](#)

The national trend is that the number of domestic abuse incidents reported has increased, with all forces showing an increase with the exception of Fife. Forces manage domestic abuse cases using a process called MARAC (Multi Agency Risk Assessment Conference). Fife implemented this process in force in October 2010 and have experienced an initial reduction in the number of incidents.

[Number of individuals brought into custody](#)

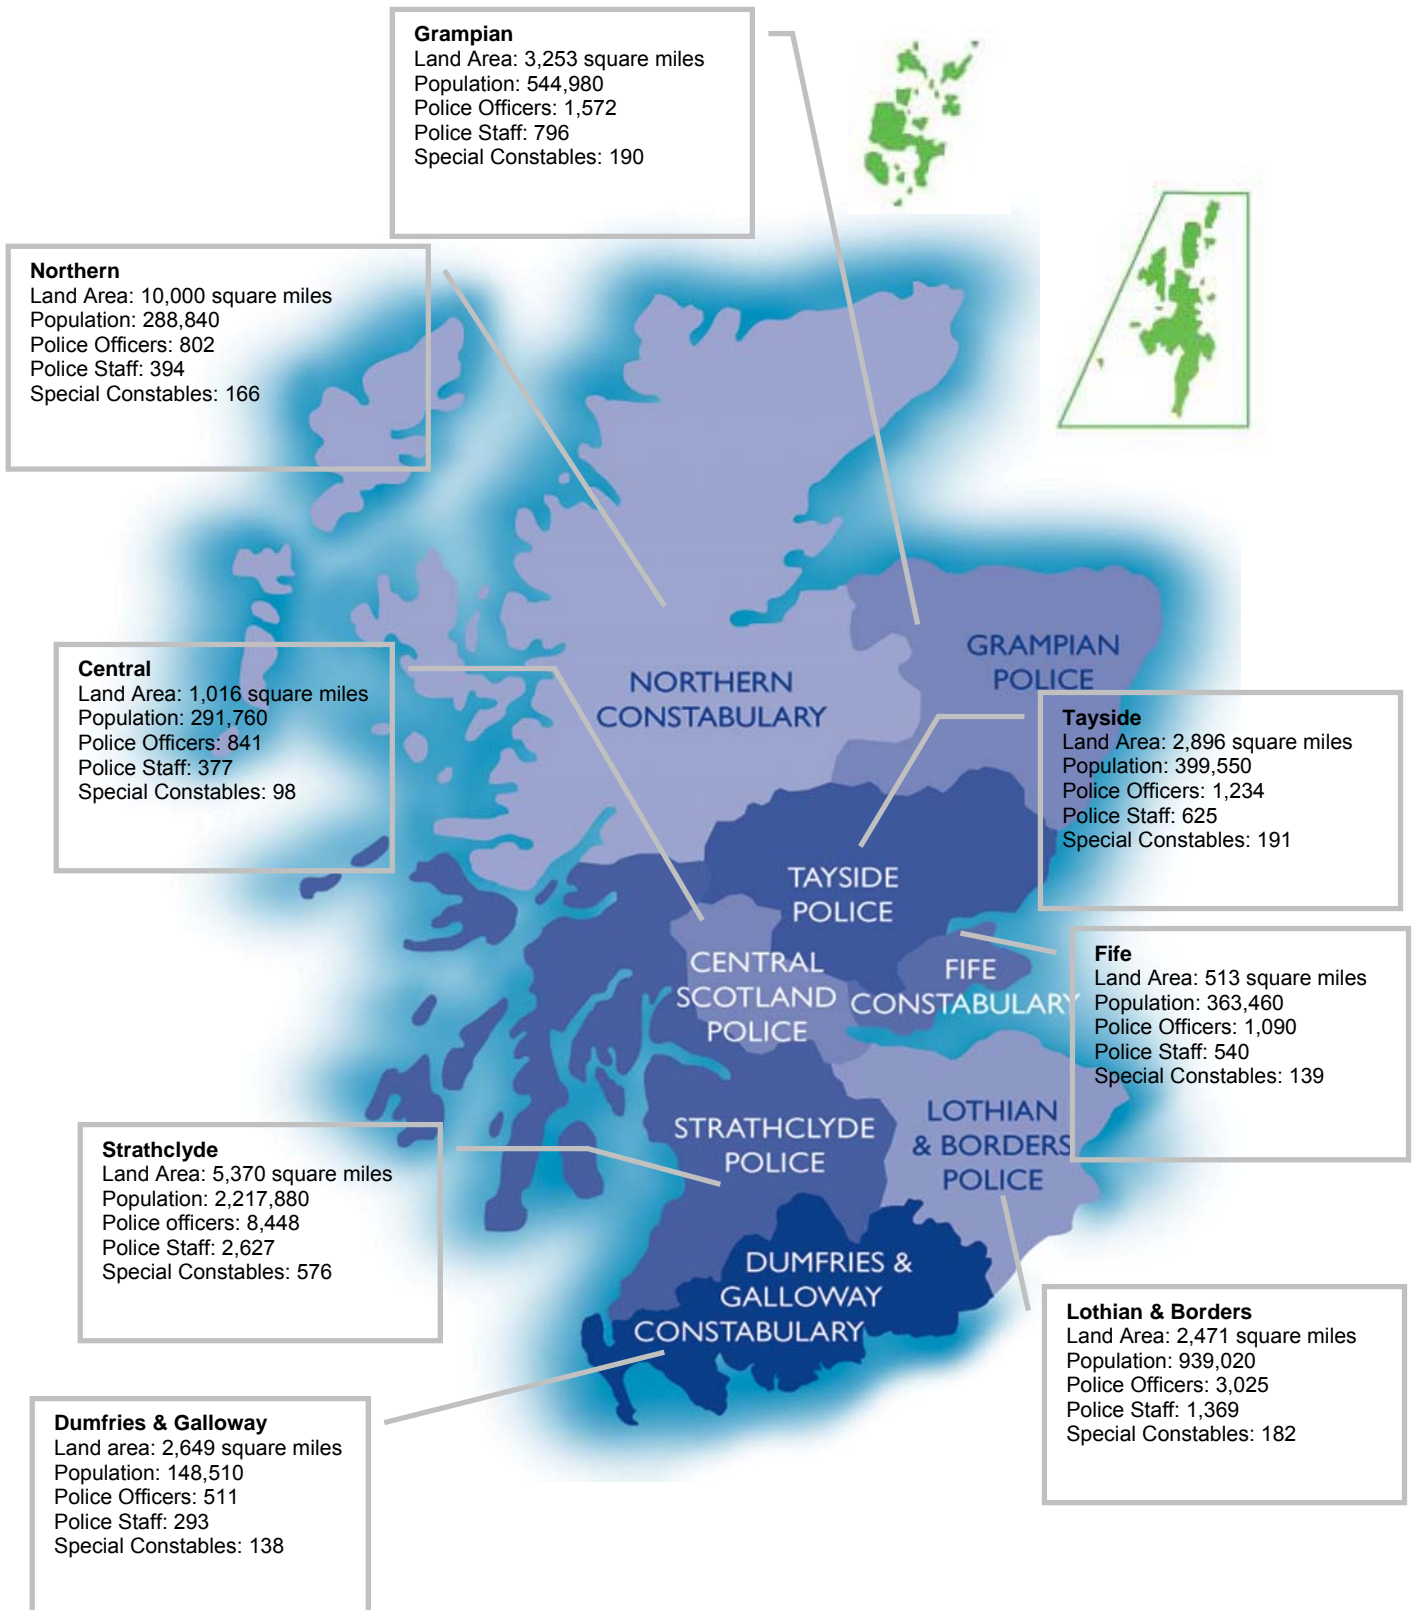

Generally across Scotland the number of individuals brought into custody has decreased, with the exception of Dumfries & Galloway and Grampian. Proportionately the number of custodies to the level of crimes detected has not changed in Dumfries & Galloway. Grampian is continuing work within their Criminal Justice and Support Division, along with COPFS and other partners to minimise the number of persons detained in custody for Court.

[Number of freedom of information requests and questions](#)

The national trend is that the number of requests and questions reported has decreased, with the exception of Tayside. However this indicator a measure of demand and its direction of travel will be generally dictated by external circumstances e.g. specific media interest in a particular topic etc and developments in information published by forces on their websites.

- [Time taken to respond to emergency response incidents](#)
- [Handling of non-emergency calls](#)

PUBLIC REASSURANCE & COMMUNITY SAFETY

- [Number of recorded crimes and offences](#)
 - [Group 1 – Crimes of violence](#)
 - [Group 2 – Crimes of indecency](#)
 - [Group 3 – Crimes of dishonesty](#)
 - [Group 4 – Fireraising, malicious and reckless conduct](#)
 - [Group 5 – Drugs and other crimes](#)
 - [Group 6 – Offences \(miscellaneous\)](#)
 - [Group 7 – Offences \(road traffic\)](#)
- [Detection rate for recorded crimes and offences](#)
 - [Group 1 – Crimes of violence](#)
 - [Group 2 – Crimes of indecency](#)
 - [Group 3 – Crimes of dishonesty](#)
 - [Group 4 – Fireraising, malicious and reckless conduct](#)
 - [Group 5 – Drugs and other crimes](#)
 - [Group 6 – Offences \(miscellaneous\)](#)
 - [Group 7 – Offences \(road traffic\)](#)
- [Number of racist incidents, racially motivated crimes & offences and detection rates](#)
- [Number of recorded antisocial behaviour community crimes & offences and detection rates](#)
- [Level of detected youth crime](#)
- [Number of persons killed or injured in road collisions](#)
- [Number of Special Constables and the hours they are on duty](#)

CRIMINAL JUSTICE & TACKLING CRIME

- [Number and percentage of reports submitted to the Procurator Fiscal within 28 calendar days](#)
- [Number and percentage of reports submitted to the Children's Reporter within 14 calendar days](#)
- [Weight of Class A drug seizures and number of supply and possession with intent to supply offences recorded](#)
- [Use of police direct measures](#)

SOUND GOVERNANCE & EFFICIENCY

- Proportion of working time lost to sickness absence
- Turnover rates for police officers and police staff
- Proportion of salary costs accounted for by overtime
- Number of police officers and police staff (full-time equivalent)
- Staffing profile by declared disability, ethnicity and gender
- Expenditure on salaries, operating costs and capital

CONTEXT MEASURES

- Number of telephone calls and incidents
- Number of sudden deaths reported to the Procurator Fiscal
- Number of missing persons incidents
- Number of registered sex offenders in the community
- Number of domestic abuse incidents
- Number of individuals brought into custody
- Number of freedom of information requests and questions

Click to return to [Contents](#) page

SERVICE RESPONSE

This area of policing relates to the quality of service provided by forces in dealing with the public. It covers all aspects of forces' engagement with the public including initial contact, responding to incidents and providing feedback. It also relates to the public's overall confidence in policing.

N.B. As of 15th September 2010, the call grading procedures in Fife have changed. Now only Grade 1 calls are classified as priority, whereas prior to this date the figure included both Grade 1 and Grade 2 calls. The Q3 figure includes Grade 1 and Grade 2 calls from April - 14 September 2010 together with Grade 1 calls from 15 September - 31 December 2010. The Force no longer reports on target times for this indicator.

PUBLIC REASSURANCE & COMMUNITY SAFETY

This area of policing relates to how forces respond to issues that impact on local communities. It includes forces' and their partners' contribution to the prevention, investigation and detection of crime. It also relates to community engagement and the public's overall perception and experience of crime and disorder in their local area.

Number of recorded crimes and offences and detection rates

The number of recorded crimes & offences; the number of recorded crimes & offences per 10,000 members of the resident population and the detection rate for recorded crimes & offences

Group 1 – Crimes of violence

CONTEXT MEASURES

Context measures are not measures of performance; rather they are designed to provide contextual information to allow better understanding of the demands on a police force and the environment they operate within.
